

Custom Aquariums

Who we are

With satisfied clients around the world, Seaquatic Aquariums has quickly established a reputation for delivering and installing premium grade acrylic sheets for world class aquariums. By utilizing cutting-edge technology and highly knowledgeable technicians, we design, engineer, fabricate and install acrylic panels for aquariums of varying sizes around the world.

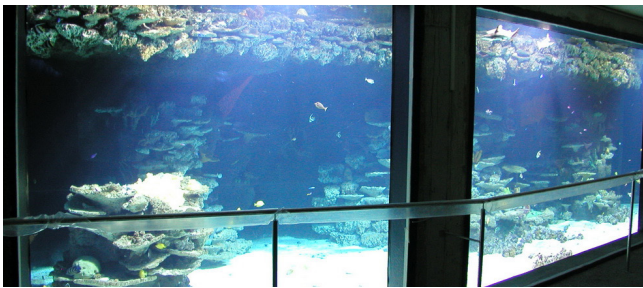

Our mission with each aquarium project is to conceptualize, design and implement the perfect acrylics solution, regardless of scope, budget size or challenges. Your satisfaction is our #1 priority.

What We Do

We bring your aquarium dreams to life using scientifically advanced Plexite® acrylic sheets, which can be quickly and easily customized to meet your project's specific requirements.

Flat Panels

Cutting-edge Plexite® acrylic and proprietary bonding and thermoforming technologies allow us to produce the world's largest and thickest acrylic flat panels.

Cylinders

The flexibility and strength of Plexite® acrylic sheets and our innovative chemical bonding technology allow us to create both large and small cylinder aquariums.

Tunnels

Allow your visitors to become part of the experience with an amazing mullionless tunnel. We have created tunnels that provide 180 degree to full 360 degree breath-taking views.

Curved Panels

Customizable Plexite® acrylic sheets and our bonding technology allow us to create large, thick curved panels with excellent optical clarity.

Aquariums That Let People View ‘Living Art’

Our unique system relies on proprietary and superior bonding technology, innovative fabrication and a highly skilled workforce to deliver the highest-quality acrylics-based aquarium systems.

Leading Builder of Large Aquariums

We have extensive experience in the design, fabrication and installation of aquariums for zoos, hotels, resorts, casinos, shopping malls, amusement parks and restaurants. In addition to using scientifically advanced Plexite® for our acrylic sheets, we also provide:

Super Strong Acrylic Bonding

Years of research & development have enabled us to produce nearly invisible bonds while maintaining superior structural integrity! Our proprietary bonding technology has a tensile strength of over 9,000 PSI, which is far superior to commercially available products. Our adhesive is clearer, harder and more chemically resistant than commercial adhesives.

High Quality Sheet Fabrication

We are proud of our reputation as a leading acrylic sheet fabricator. We make sure that we fully understand your application and requirements and then provide a high quality solution that meets your specifications. Our state-of-the-art fabrication facility is equipped with the latest and most precise equipment which we use to manufacture acrylic sheets to your exact requirements.

Professional Polishing

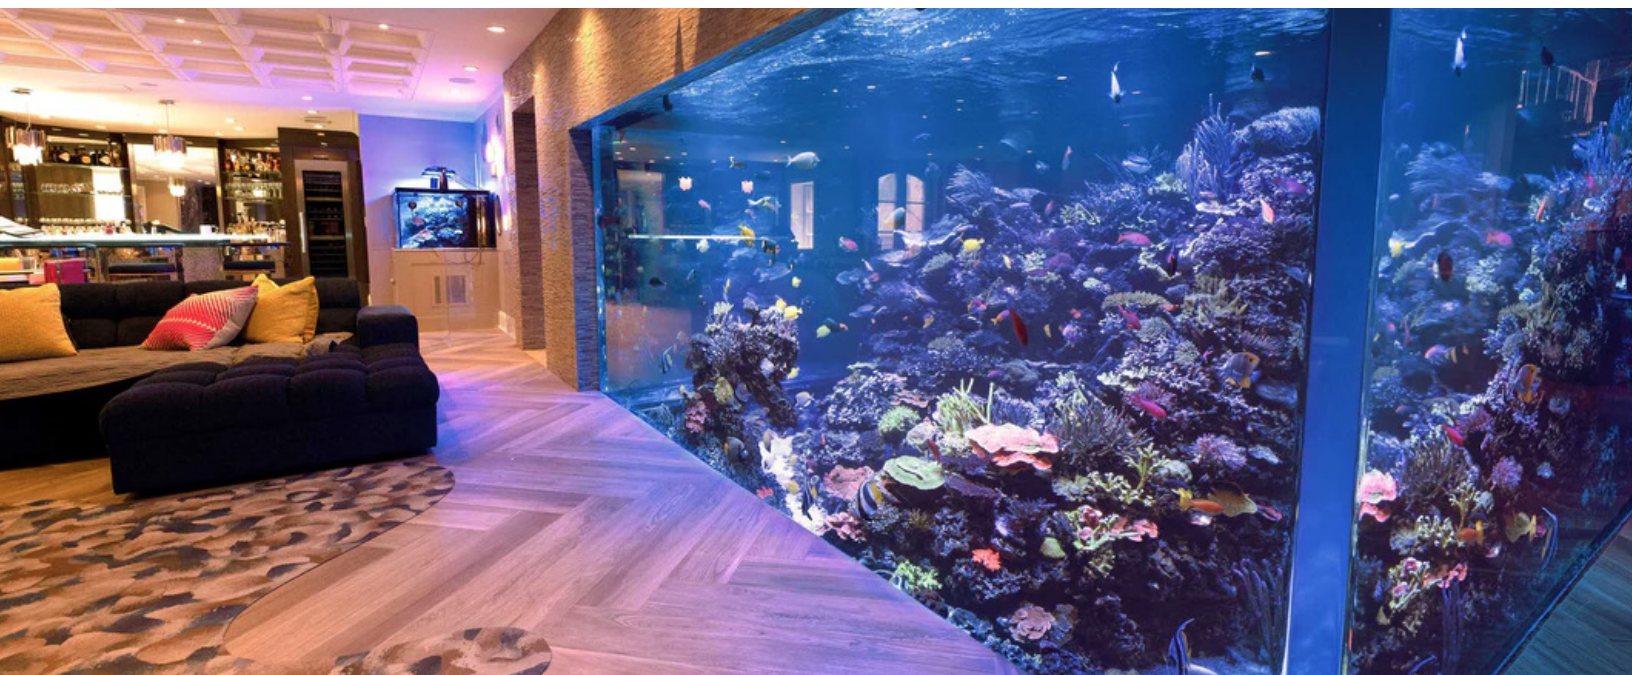

Polishing an acrylic transparency is a highly laborious process that requires extreme attention to detail. We hire and thoroughly train skilled workers who are able to deliver the absolute highest quality optical finish. The process starts with an aggressive abrasive and proceeds with incremental steps until a 1-micron optical finish is achieved.

Your Turnkey Aquarium Provider

We not only manufacture acrylic sheets but we also install them!

Few companies provide clients with a complete turnkey aquarium solution that includes design, fabrication and installation but we feel it is important to do so. After all, you can have an acrylic sheet designed and fabricated to your exact specifications but if it is not installed properly you could be in for years of headaches and extra costs.

At Seaquatic Aquariums, our experts can ensure your acrylic sheets are installed properly so that you don't have to worry about any issues like leaks, cracks, poor seals and more. Our installers also work fast and efficiently so that you stay on schedule and on budget.

Turn Your Aquarium Vision into Wonderful Reality!

At Seaquatic Aquariums, our designers are experts at creating acrylic sheet solutions that meet your project specifications while also providing optical clarity, weatherability and strength.

Our team works closely with you to gain a full understanding of your needs; then works diligently to create a design that exceeds your expectations, gets you excited and takes your project to the next level.

No design is too challenging... or too simple. Our goal is to produce a solution that aligns perfectly with your project goals - whether that is visually stunning or more functional.

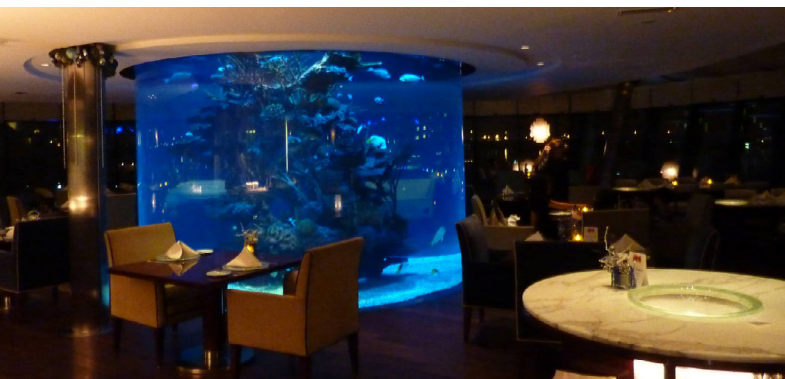

FEATURED PROJECT

Roger Williams Zoo

Seaquatic Aquariums was hired to provide acrylic viewing panels and windows to the zoo's new 10,000 square foot rainforest building. Conceptual drawings of the structure show a rising path that will enable visitors to see rainforest creatures at all levels, from fish underwater to birds and monkeys high in the tree canopy.

Delivering Excellent Clarity & Unmatched Strength!

We focus on attention to detail, highest quality products, reasonable lead times, competitive pricing and overall customer satisfaction. From creative, cutting-edge design to innovative fabrication and focused installation, we are committed to providing top quality service to our clients, whatever the size of the project.

How We Do It

We place a high premium on ensuring quality through every stage of aquarium development, from concept design all the way through to fabrication and installation.

With our well-equipped production facility, extensive experience, full fabrication capabilities you can count on us to make your dream tank affordable when other manufacturers cannot. And remember, we can create acrylic aquariums of any size and virtually any shape.

Dream your aquarium and we can
design it, build it and install it.
